Lab Exercise 1.1 - List access using Azure RBAC and the Azure portal

You need an Azure subscription to complete the exercises. If you don't have an Azure subscription, create a [free account](#) and add a subscription before you begin. If you're a student, you can take advantage of the [Azure for students](#) offer.

A. List role assignments for yourself

Follow these steps to see what roles are currently assigned to you.

1. Sign in to the [Azure portal](#).
2. On the Profile menu, select the ellipsis (...) to see more links.

Task 1: Screenshot of your Azure “My Permission” required here.

3. Select My permissions to open the My permissions pane.

You'll find the roles that you've been assigned and the scope. Your list will look different.

Task 2: Screenshot of list "My Permission" required here.

Subscription permissions

See your access to a subscription

Subscription: Azure for Students

You have the following access:

- Your account 'keertennahdevi@live.utm.my' has been assigned the role 'Owner' (type BuiltInRole) and has access to [Azure for Students](#)

[Go to subscription access control \(IAM\)](#)

B. List role assignments for a resource group

Follow these steps to see what roles are assigned at the resource group scope.

1. In the Search box at the top, search for and select Resource groups.

2. In the list of resource groups, select a resource group.
These steps use a resource group named example-group, but your resource group's name will be different.

3. On the left menu pane, select Access control (IAM).

4. Select the Role assignments tab.

This tab shows who has access to the resource group. Notice that some roles are scoped to This resource, while others are (Inherited) from a parent scope.

Home > Resource groups > example-group

example-group | Access control (IAM)

Search

Overview, Activity log, Access control (IAM), Tags, Resource visualizer, Events, Settings, Deployments, Security, Policies, Properties, Locks, Cost Management, Cost analysis, Cost alerts (preview), Budgets, Advisor recommendations

Check access, **Role assignments**, Roles, Deny assignments, Classic administrators

Number of role assignments for this subscription: 60 / 4000

Search by name or email, Type: All, Role: All, Scope: All scopes, Group by: Role

38 items (25 Users, 4 Groups, 8 Service Principals, 1 Managed Identities)

Name	Type	Role	Scope	Condition
Billing Reader				
Alain alain@contoso.com	User	Billing Reader	This resource	None
App2	App	Billing Reader	Subscription (Inherited)	None
Sales Admins	Group	Billing Reader	Subscription (Inherited)	None
user-assigned-identity	User-assigned Managed Identity	Billing Reader	Subscription (Inherited)	None
Contributor				
Alain alain@contoso.com	User	Contributor	Subscription (Inherited)	None
Ann annm@contoso.com	User	Contributor	Subscription (Inherited)	None

C. List roles

As you learned in the previous unit, a role is a collection of permissions. Azure has more than 70 built-in roles that you can use in your role assignments. To list the roles:

- In the menu bar at the top of the pane, select the Roles tab to list of all the built-in and custom roles.

- Select a role's View link in the Details column, then select the Assignments tab to display the number of users and groups assigned to that role.
