Lab Exercise 1.3 - View activity logs for Azure RBAC changes

View activity logs

The easiest way to get started is to view the activity logs with the Azure portal.

1. Select All services, then search for Activity log.

2. Select Activity log to open the activity log.

The screenshot displays the Azure Monitor 'Activity log' page. The left sidebar contains navigation links: Overview, Activity log (selected), Alerts, Metrics, Logs, Change Analysis, Service health, Workbooks, and Insights. The main content area shows a search bar, a 'Quick Insights' link, and filter buttons for Subscription (Azure subscription 1), Event severity (All), and Timespan (Last 6 hours). Below the filters, a table lists 4 items:

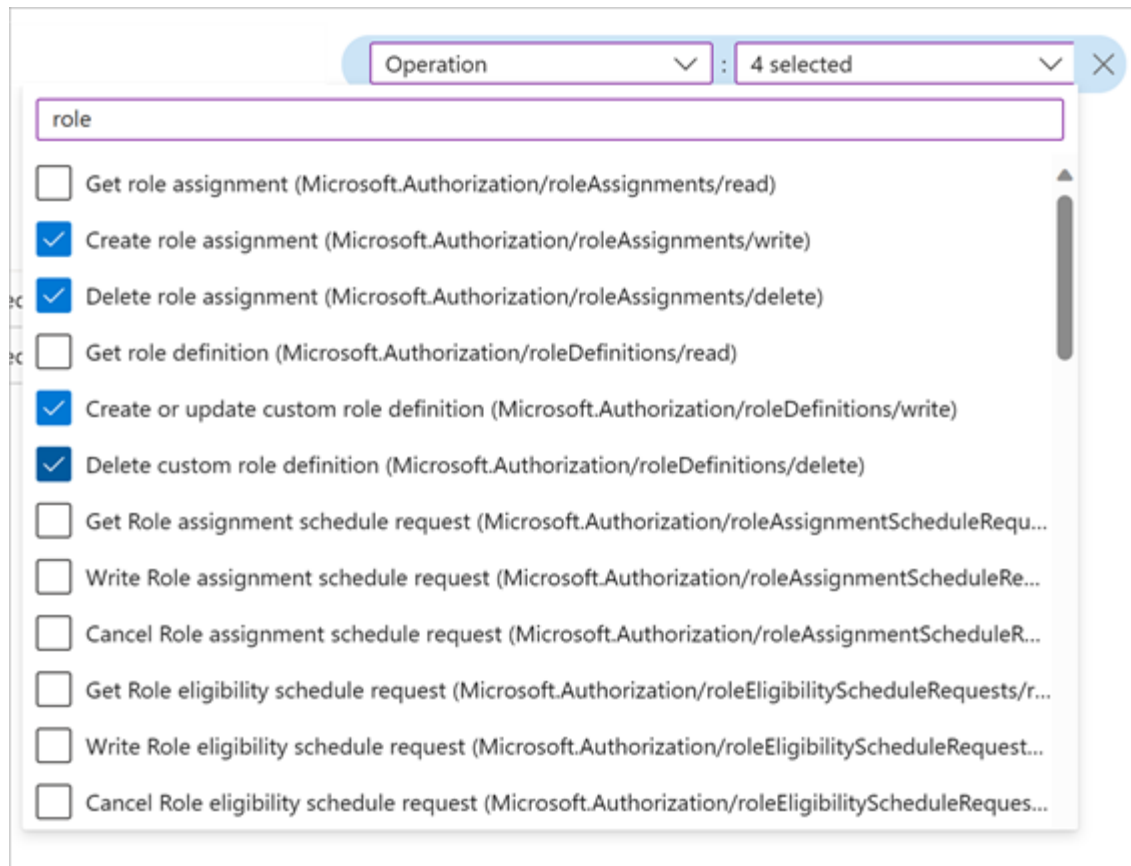

Operation name	Status	Time	Time stamp	Subscription	Event initiated by
> Delete resource group	Succeeded	4 minutes a...	Thu Sep 07 ...	Azure subscription 1	
> Delete role assignment	Succeeded	5 minutes a...	Thu Sep 07 ...	Azure subscription 1	
> Create role assignment	Succeeded	7 minutes a...	Thu Sep 07 ...	Azure subscription 1	
> Update resource group	Succeeded	21 minutes ...	Thu Sep 07 ...	Azure subscription 1	

Task: Screenshot of your “Activity log” required.

The screenshot displays the Microsoft Azure Monitor Activity log interface. The top navigation bar includes the Microsoft Azure logo, a search bar, and various utility icons. The left sidebar contains a navigation menu with options like Overview, Activity log (selected), Alerts, Issues (preview), Metrics, Logs, Change Analysis, Service health, Workbooks, Dashboards with Grafana (preview), Insights, Managed Services, Settings, and Support + Troubleshooting. The main content area shows the 'Monitor | Activity log' page with a search bar and a list of 5 items. The items are displayed in a table with columns: Operation name, Status, Time, Time stamp, Subscription, and Event initiated by. The 'Create policy assignment' operation is highlighted.

Operation name	Status	Time	Time stamp	Subscription	Event initiated by
> Delete role assignment	Succeeded	2 minutes a...	Thu Nov 13 ...	Azure for Students	keertennahdevi@live.utm...
> Create role assignment	Succeeded	16 minutes ...	Thu Nov 13 ...	Azure for Students	keertennahdevi@live.utm...
> Update resource group	Succeeded	26 minutes ...	Thu Nov 13 ...	Azure for Students	keertennahdevi@live.utm...
> Create policy assignment	Succeeded	4 hours ago	Thu Nov 13 ...	Azure for Students	CABProvisioning
Create subscription	Succeeded	4 hours ago	Thu Nov 13 ...	Azure for Students	keertennahdevi@live.utm...

3. Set the Timespan filter to Last month.
4. Add an Operation filter and type role to filter the list.
5. Select the following Azure RBAC operations:
 - Create role assignment (roleAssignments)
 - Delete role assignment (roleAssignments)
 - Create or update custom role definition (roleDefinitions)
 - Delete custom role definition (roleDefinitions)

6. After a moment, you'll get a list of all the role assignment and role definition operations for the last month. There's also a button at the top of the screen to download the activity log as a CSV file.

7. Select one of the operations to get the activity log details.

The screenshot displays the Azure Monitor 'Activity log' interface. On the left, a navigation pane lists various monitoring tools, with 'Activity log' selected. The main area shows a list of activity log entries for 'Azure subscription 1'. The entry 'Create role assignment' is highlighted. On the right, a detailed view of this operation is shown, including its resource, name, timestamp, initiator, message, role, and scope.
